Question & Answer

U Chit Win (VH) – What kind of job we (villagers) can apply and how can we know the vacancy?

ALO - Engineer (especially Mechanical & Electrical) works are mostly but the rest position you can apply any time. You can submit your CV to township Labor Office and whenever we have vacancy, we will make first priority for our community. We will announce for vacancy at Township Labor Office and in all village.

U Chit Win (VH) – Sate Nyan village entrance bridge was reconstructed by the Sembcorp's contractor in operation period when the discharge/intake pipes buried time, the new bridge was not good enough and now we like to request you to repair as good as old one. 2018MMRMM011

ALO – We will record your point to report our management and will reply you shortly

Stakeholder Engagement Report – November 2018

Day – 1
Date – 23 Nov 2018 (Friday)
Time – 11:00am ~ 1:30pm
Venue – Thein Village, Village Monastery
Household – 188
Population – 786
Attendance – 133 pax
Presented by – Aung Lwin Oo @ ALO
Presenting Material – 33 Vinyl Slides in Myanmar Version (Please see in attached document)

Question & Answer

Daw Mya Mya San (Villager) – we smell fuel/gas in air which is came from Sembcorp Plant we think
ALO – we are not only one plant around the area and there two existing power plant and one more plant will be operated in near future. But I am sure that we are monitoring the air emission and it is still in line so far with IFC and Government Standard

Stakeholder Engagement Report – November 2018

Day	– 1
Date	– 23 Nov 2018 (Friday)
Time	– 3:00pm ~ 5:00pm
Venue	– Hnan Village, Village Monastery
Household	– 128
Population	– 557
Attendance	– 143 pax
Presented by	– Aung Lwin Oo @ ALO
Presenting Material	– 33 Vinyl Slides in Myanmar Version (Please see in attached document)

Question & Answer

U Mi(Villager) – We hear high noise from the plant and it will reduce in future or just like that?

U Hein Min Lwin (VH) – The very high sound is not coming from the Sembcorp Plant and it's come from others plant as I know that the Sembcorp Plant noise level much lower than other there.

U Sar Mi (Villager) – We would like to request for drainage beside (both side) of the village entrance road.

ALO – We will consider this as priority for future CSR activities as we are here for 22 years.

U Thein (Villager) – For underground fire water tank, it is built 4 feet underground and only 2 feet above the ground. Why the whole part is not above the ground level like others tank.

ALO – The design was suggested/instructed by District Fire Department when we inquiry there before we construct.

Daw Say (Villager) – The water treatment system which Sembcorp installed is not working as our pipe tube well to access the ground water is not working properly due to the damage of pipe tube problem under the ground and we would like to request your help to fix the damage please

ALO – We will note and report our management first and will reply you after we check the process to repair weather we can fix or not.

Stakeholder Engagement Report – November 2018

Day	– 2
Date	– 24 Nov 2018 (Saturday)
Time	– 9:00am ~ 10:00am
Venue	– Aye Village, Village Townhall
Household	– 78
Population	– 400
Attendance	– 86 pax
Presented by	– Aung Lwin Oo @ ALO
Presenting Material	– 33 Vinyl Slides in Myanmar Version (Please see in attached document)

Question & Answer

U Than Win (Villager) – We would like to request Sembcorp to repair/upgrade the road (beside along the irrigation canal) and if you can say yes, we like to know when will you repair/upgrade the road

ALO – I cannot grandee that we will repair or upgrade but we are here for 22 years and will continue CSR activities which support the community developing

U Than Win (Villager) – How do you use gas? How you manage the smoke?

ALO – As I explained in my presentation slide, the gas burned to run two gas turbines and steam turbine will be run by using of heat which produced by the two gas turbines.

U Than Win (Villager) – After the burring work, the land was not good to grow crop and different from the original soil quality

U Pho Thein (Villager) – The farm land was not good so far as after burring work as the soil was excavated up and down. Soil layer also so thin in my farm and sand layer excavated.

(Villager) – No different the place pipe buried and not buried place in my farm. I did not hear from others farmers near me as well and I think our land had thick layer of soil and your farm has a thin layer of soil

Stakeholder Engagement Report – November 2018

Day	– 2
Date	– 24 Nov 2018 (Saturday)
Time	– 11:00am ~ 1:00pm
Venue	– Tha Pyay Thar Village, Village School
Household	– 240
Population	– 1135
Attendance	– 184 pax
Presented by	– Aung Lwin Oo @ ALO
Presenting Material	– 33 Vinyl Slides in Myanmar Version (Please see in attached document)

Question & Answer

U Win Shwe (VH) – We need electricity in our village and if Sembcorp can help?

ALO – We can able to produce the power and distribution is up to Government. We are not authorized power distribution

U Win Shwe – Regarding to the fire emergency water tank, we would like to know is it possible to build above the ground level (no underground) as our village locate lower ground lever by the river and whenever water level is get up, it reach above the tank. Then, mosquitos can be alive in the tank and effect to the villages' health.

ALO – Before we construct and support the water tank for fire emergency, we met District Fire Department Officer for the tank design and they recommended underground water (just like we built)

U Win Shwe (VH) – We bought the land in front of the school compound to extend the area of the school compound. Now we the extended area needed to be fenced and will be costed six millions kyat. We would like to request Sembcorp to support as much as possible for the fencing cost.

ALO – We are here for 22 years and will continue the CSR activities to develop the community. Education is our main focus in developing the community. I will report your request to our Management and will reply you shortly.

U Win Shwe (VH) – Our villager (Daw Than Htay) said there are many stone placed in her land at the river bank and she would like to get the compensation for that.

ALO – We will note down all the point you speak here to report the management and will send our staff to investigate/inquiry about the land issue. (Grievance 2018MMRMM008)

Stakeholder Engagement Report – November 2018

Day	– 2
Date	– 24 Nov 2018 (Saturday)
Time	– 3:00pm ~ 5:00pm
Venue	– Hta Naung Tai Village, Village Administration Office
Household	– 250
Population	– 1227
Attendance	– 122 pax
Presented by	– Aung Lwin Oo @ ALO
Presenting Material	– 33 Vinyl Slides in Myanmar Version (Please see in attached document)

Question & Answer

U Tin Zaw Villager – What is the boiler’s expire date? If the boiler explore, how does the local people will be effected?

ALO – We have to apply the official license from Government Boiler Inspection Department to run the boiler, boiler operating license period is four years and has to be extend in every four years. Whenever the time of extending, the Government Authorities will check boiler whether it can be run for next four years or not.

U Thet Naing Villager (Ywar Thar Gone) – Who monitor the discharge water quality?

ALO – We monitor the quality of discharge water by 24/7 but Directorate of Water Resources and Improvement of River Systems (Government) will check at a laboratory which they chosen in every three month (quarterly).

U Thet Naing Villager (Ywar Thar Gone) – Can we check the discharge water quality at laboratory as we do not trust on Governmental Department?

ALO – I will check with our management and will reply you as soon as possible (informed to Ko Thet Naing on 20181128 that they can check the discharged water quality and gave him SMPC HSE Manager’s contact for more details information)

U Thet Naing Villager (Ywar Thar Gone) – We would like to visit to the plant and if you have any plan to invite the local people, may I suggest not only to invite village head but also villagers as well.

ALO – We will let you know in advance if we have any plan to invite the villagers to visit to our plant.

U Thet Naing Villager (Ywar Thar Gone) – Ywar Thar Gone village is not in SMPC’s community list, but 4 or 5 farmers (SMPC water discharge pipeline and water intake pipe line buried in their farm) ware stay in our village. We wants you to put our village under your community list for CSR activities. Our village primary school need many help/support to upgrade/repair/re the building

ALO – We will report to our management for your propose and will reply you as soon as possible.

U Thet Naing Villager (Ywar Thar Gone) – The support items are not locate really needed place and not useful for the villagers. For example, water treatment system for Hta Naung Tai, it is located out of the village.

Stakeholder Engagement Report – November 2018

ALO – we do not decide the location for the support items (water treatment system). We asked to the village head and his member committee decided. If there any argument occur, we request to Township GAD Officer to be involved and follow his decision (as per the Grievance Committee Procedure).

U Thar Villager – 5 electric pole installed in my farm and I received only 3 bags of fertilizer. One more thing in my farm, I construct stone boundary and it was removed by the SMPC's contractors during the underground water pipe burring work. Till now no one rebuild the boundary and I would like you to rebuild.

ALO - I will send my team your farm to inquiry for more information and will reply you asap. (Grievance 2018MMRMM006)

U Aung Kyaw Moe (U Ba La) Villager – There is 2 electric pole installed in my farm and no supporting fertilizer bags till now.

ALO - I will send my team your farm to inquiry for more information and will reply you asap. (Grievance 2018MMRMM005)

Question & Answer

U Kyaw Htay Villager – We want an engagement which will be involved 3 parties. (SMPC, Community, IFIWM)

ALO – Why do you want to engage as 3 parties?

U Kyaw Htay Villager – As we do not know how the project will be effected to the community that is why I am propose to engage with IFIWM's professionals. For an example, there is one labor case in project period and I (myself) help to a local labor at police station. We need to know the labor law.

ALO – I can provide the labor law book (which is issue from Government Labor Office Officially).

U Kyaw Htay Villager – Yes, please provide us and we will study from that book. One more question, any plan for the training at Government School/University?

ALO – Yes we have. We did plan to give training the student from Myingyan Technical University. We will announce/inform to the respective persons when our schedule is outcome.

U Kyaw Htay Villager – CSR activities will be only one year or will be continued?

ALO – we will continue the CSR activities for 22 years.

U Chit Ko (Taung Tha) – How can we know that the discharge water is clean?

ALO – We can say our discharge water is much cleaner than the intake water we take from the river. We are welcome if you wants to take our discharge water to send laboratory and we will engage to our HSSE department for the more details.

U Win Zaw Villager – Can we get your discharge water for farming?

ALO – No, we cannot provide the discharge water for farming due to the Lenders' instructions.

U Win Zaw Villager – I would like to know the information of vibration and air quality due to the V-Power Company.

ALO – Sorry, I cannot comment for others company and I can clarify only about our Company/Plant (SMPC)

6

Day – 3
Date – 25 Nov 2018 (Saturday)

Question & Answer

13

Stakeholder Engagement Report – November 2018

U Kyaw Oo Village School Principle – I have any comment but wants to thanks to SMPC for the activities you did for our village school. SMPC supported 40 set of chair and bench, 2 room set toilet, Whiteboard and accessories, school fencing and upgraded the school drainage system. All these supporting effected to the school to be upgraded to be Basic Education Middle School from Basic Education Primary School. Now our village Primary School has been upgraded to Middle School by the Government. We do thank to the Company and wish to continue this kind of developing activities in our village. On behalf of villager, student and community, I wish the company also prosperous in future.

U Kyi Aung Villager – I am the oldest man in this village and would like to speak on behalf of all villagers. We noted and thank you for supported in our village Education (Chair and bench, whiteboard and accessories, School Drainage System and Fencing), Village Health (supporting the water treatment system) and underground water tank for fire emergency. We wish the Company prosperous in future and continue the CSR activities in future.

U Win Hlaing Village Head – We are very thankful to SMPC to be here for our village developing. Our village is economy based on the agriculture and need major support in health. We need a clinic in our village and I would like to request Company to support for village clinic please. And our village does not have the Village Administration Office and we like to request Company to support for village administration office as well please.

A Villager (Student) – I am attending 1st Year for Bachelor of Engineering and I would like to know how can we get a job in your plant and how can we submit our CV to your company?

ALO – We will announce officially at Myingyan and Taung Thar Labor Offices and Village Administration Offices when we have any vacancy. You can submit your CV to the relevant Township Labor Offices and at our Plant HR Department directly.

Highlight of Conversation

Villager U Tin Maung Aye Requested to SMPC (1) for maintenance of water treatment plant (which SMPC supported in Year 2018) as he think it's time for overall checking and repair necessary. (2) He also mentioned that Education is the most important for Development and he wants SMPC to support especially for Education such as refurbish/newly build classroom.

SMPC

Replied him that (1) will be consider in next CSR cycle to maintain water treatment plant such as filtration system and also requested to village for regular maintain from village side. (2) Enhancing the Education and Health are first priority of SMPC's policy and will be continued in future CSR activities.

Village School Teacher Daw Hla Hla Win Requested to repair classroom ceiling and playground for Village School. She also highlight to support clean water for Village School.

SMPC

Replied her that clean water, classroom ceiling and playground for Village School will be consider in next CSR cycle base on the budget. SMPC also explained about budget that all 13 villages will be equally share the amount of budget and will be consider base on village's request and budget.

Villager U Win Zaw

He has concern about lack of groundwater and increasing the temperature would be effected by Sembcorp Plant. He saw a lot of heat smoke which produced from the Plant.

SMPC

Explained that the Plant was not permitted to use underground water for any purpose and plant is using only river water.

Than Htut Aung – Senior Engineer from EPGE also explained that the smoke which villager mentioned is not heat smoke and it was just steam from the cooling tower and explained the detail how the cooling tower process.

Highlight of Conversation

Village Head U Win Hlaing

- Request SMPC to shift the water treatment system inside to the school compound as the water source was not available.
- They had requested Village Clinic (12' x 18') to SMPC for CSR project in Year 2020. But would like to change the size to (16' x 24') instead of (12' x 18').

SMPC replied that

- shifting the water treatment plant, advised to connect the monastery water pile source to get the ground water instead of shifting.
- this is not a commitment but will consider as much as possible as SMPC is doing Equally CSR activities in community 13 villages.

Villager U Aung Min Nyi

- He think it is lack of rain in raining season during 3 years (after SMPC arrived) and also request SMPC for micro financing to villagers individually.

EPGE Zaw Win Myint replied that

- Lack of rain in raining season is happening in all over the country and the factory is comply with MOREC standard.

SMPC replied that

- SMPC will not do micro financing but will do CSR activities to develop the community such as Education and Health channels.

Highlight of Conversation

Villager U Win Kyaing

-He knew from Tha Pyay Thar Village that some of fishermen are not able to catch fish like before. In the past the fishermen can catch much fish easily and it is getting decrease now.

- He also knew from Sarkhaar Village that villagers concerned about the noise from plant and farmers concerned about plant affecting to the farming.

SMPC Replied him that

-Fishing concern from Tha Pyay Thar, SMPC has made Public Stakeholder Engagement Section yesterday and no one saying that their fishing concern is due to the SMPC but fisherman said there is many unofficial fishing (e.g. battery shock fishing) around the area. Government also taking action for this unofficial fishing. And SMPC suggested to villager to inquiry to Tha Pyay Thar Village Head and Villagers for wat he hear about is correct or not. The villager should listen to Tha Pyay Thar VH and Villager's answer instead of listen from SMPC.

-Noise concern from Sarkhaar, SMPC has made Public Stakeholder Engagement Section in this morning explained that we are following and complying our Government Standard (MOREC) and IFC Standard. For effecting to farming, we are keep in touch not only Village Head but Villagers. If there any issue about effecting farming, the villager can approach to SMPC directly or via Village Head and we will consider all the concern case we received. For the example, we received an information from Sarkhaar Village Head in last few

days ago that an incident which occurred in November 2019 where a farmer in Sarkhaar village lodged a grievance regarding the flooding of his farmland, allegedly due to discharge from the plant. Actually that flooding was not due to any activities which were carried out by the plant, but rather, it was an unfortunate consequence of the heavy rains which occurred during this period. The project company constructed a drainage canal to safely channel rainwater away from the plant, and the drainage canal has performed adequately for the past year. However, the recent construction of a rainwater drainage canal by the nearby V-Power plant, connected to ours, has resulted in an overload in the volume of rainwater in the canal. This led to the erosion of the embankment on the descending side of the canal, allowing the excess rainwater to flood into the nearby fields. We worked with V-Power in order to prevent this incident from occurring again and took the necessary actions.

Villager U Win Sein (U Thar)

-He request to get sludge which SMPC dispose to the disposal compartment

SMPC Replied him that

-Cannot answer this question on the spot but advised to write a letter officially.

Villager Head U Aye Ko, Villager U Ktay Kyaing, U Than Zaw Htike U Myint Oo
-Requested SMPC to provide Water Treatment Plant.

SMPC Replied

-SMPC was provided a water treatment plant each in our community in Year 2018 but Hta Naung Tai got 2 Water Treatment Plant due to the area of village and demand. So, I would like to highlight that we already provide 2 water treatment plants to your village and it is more than the others village get. Anyhow, will be report to management to consider in next CSR cycle.

Villager Teacher Daw Yee Yee Myint
-concern about discharge water to
Ayeyarwaddy River and would like to
know the water discharging process

SMPC Explained

-details process of discharging water to
Ayeyarwaddy River including monitoring
temperature, PH level and quality of
discharge water. Explained how SMPC
complied with Government Standard
and IFC standard.
